How to check links

A key technical testing task is to check all the links. Adobe Dreamweaver CS3 enables you to do this automatically.

- 1. Start Dreamweaver.
- 2. Make sure your site is open.
- 3. On the menu bar, select Site > Check Links Sitewide.

The Link Checker tab displays all the broken links in the site (Figure 1).

Note: Even though links are listed as broken, check them in the browser to confirm.

4. Fix the broken links and check the links again.
