

## Planning a home page

The home page storyboard includes a design layout (graphics, text, and site navigation scheme) to make creating the home page easier. Use the following guidelines to help you create the storyboard of your home page on paper.

### Graphics

Draw rectangles on the page to indicate the size and placement of graphics. Label these rectangles with the filenames of the graphics they represent.

- What graphics will you include on the home page?
- Where will you place the graphics on the page?

### Text

Draw rectangles on the page to indicate the text placement. Label these rectangles with content descriptions.

- What text will you include on the home page?
- Where will you place text on the page?

### Navigation

Draw a rectangle to indicate the placement of the links to other pages. Label this rectangle with the names of the other pages. (You will build graphical buttons for these links later in this course.)

- According to your flowchart, the home page directly links to what pages (what are the menu items)?
- Where will you place these links on your home page?

### Color

Indicate the background and text colors on your storyboard.
